

Customer's Plant

These units will be installed as Units No. 1 and 2 at the new Intermountain Power Generating Station to be built near Lynndyl, Utah. Plant elevation is 4676 ft. above sea level. Each unit will supply steam to a GE turbine/generator rated at 820 MW.

The Intermountain Power Agency is comprised of a total of 36 municipals, utilities and co-ops in Utah and California. The engineers on the project are Black and Veatch, Kansas City, MO. with the Los Angeles Department of Water and Power in Los Angeles, California as the principle owner and operator.
